#### Lectures (content, delivery, pace)

I like that some questions from example sheets are included in lectures ~~as~~, and that the written notes are available almost instantly after the lecture.

#### Support Classes (supervisions, tutorials, computer classes)

The variety of easy/hard questions in the tutorial creates a balance where I can still work on other questions in my own time and benefit from seeing how different questions are tackled.

#### Course materials (notes, example sheets, solutions, textbooks)

The course notes are a little overwhelming at first, but it is good to have a ~~lot~~ wealth of material to draw from when studying.

Extreme Values and Financial Risk

Lecturer: ... Saralees Nadarajah .....

Your name (optional): ... DANQING LI .....

Please comment on the following for this course unit.

### Lectures (content, delivery, pace)

lectures: content: easy to follow and examples are very clear.

delivery: The best out of all courses!

pace: easy to follow.

### Support Classes (supervisions, tutorials, computer classes)

tutorials: I attended the Tuesday 10-11 Simon-C tutorial on week 3  
(I missed the week 2 session, sorry ; I found the solution for  
week 2/example 1 is more useful than the podcast)

But your tutorial is my favourite tutorial over all courses

that I take! It has been a great help (for Statistical Method as well)

Course materials (notes, example sheets, solutions, textbooks) and Stephen & another

TA are all very helpful ;

online notes: I couldn't find out where we are teaching now ;

Is it the notes are slightly different to our handwriting notes?

example sheets = very well-planned and well-covered; but since my calculus / calculation is so bad, I couldn't do most of them right at the first try, until I read your solution.

solutions: very good!

textbooks: haven't read it yet ; sorry.

Sorry  
I can't  
remember  
this  
person's  
name ;

Lectures (content, delivery, pace)

Very good but ~~to~~ slaying down would help.

Support Classes (supervisions, tutorials, computer classes)

• Good!

Course materials (notes, example sheets, solutions, textbooks)

Confusing online material -

would help if you clarified

which lectures are for which

day / week (Putting dates on online material)

→ which notes are relevant.

Lectures (content, delivery, pace)

Best lecturer in the state  
Great department by a mile.  
Clear ~~pace~~ and explanations.

Support Classes (supervisions, tutorials, computer classes)

Great ~~Great~~ Keep the same,  
I like how you give us  
time to answer the Q's then  
go through it on the board.

Course materials (notes, example sheets, solutions, textbooks)

Good You are too kind!

Nothing to change

Lectures (content, delivery, pace)

Nice and detailed with lots of examples

Support Classes (supervisions, tutorials, computer classes)

Room too large. Difficult to get help.

Course materials (notes, example sheets, solutions, textbooks)

Second to none.

Most attentive lecturer I've had

#### Lectures (content, delivery, pace)

I like the lecturer's style of teaching due to the pace and clear delivery. The content however is a bit boring.

#### Support Classes (supervisions, tutorials, computer classes)

The tutorials would be better if ~~the~~ it was organised into smaller classes, ~~for~~ like statistical methods, but ~~it~~ it is understandable that this is not possible.

#### Course materials (notes, example sheets, solutions, textbooks)

The notes are sick, the example sheets are too long, ~~but~~ the solutions are clear.

Lectures (content, delivery, pace)

delivered well details are well explained.

Support Classes (supervisions, tutorials, computer classes)

okay good we get sheets but 1 to 1 help with that good

Course materials (notes, example sheets, solutions, textbooks)

notes are fantastic  
e-mails don't come often enough  
organisation is fantastic.  
post grad is very good

Lectures (content, delivery, pace)

clear

Support Classes (supervisions, tutorials, computer classes)

okay 👍

Course materials (notes, example sheets, solutions, textbooks)

~~notes and~~ the solutions is unclear and different  
from the one being taught in front

Lectures (content, delivery, pace)

Good, sometimes ~~now~~ changes page too quick  
and then I miss some notes

Support Classes (supervisions, tutorials, computer classes)

Good, maybe go over things we should know  
just once for a refresh. ~~Also~~  
If you can't do full workings in class,  
post online?

Course materials (notes, example sheets, solutions, textbooks)

Good.
