Your name (optional):..... *Mafi Boateng*.....

Please comment on the following for this course unit.

Lectures (content, delivery, pace)

*Very good understandable lectures
Good pace, can be fast but usually good (very funny as well)
Best content and delivery in the uni.*

Support Classes (supervisions, tutorials, computer classes)

Great classes, covers all my issues

Course materials (notes, example sheets, solutions, textbooks)

Perfect, couldn't be better

1000/100 ✓

Lectures (content, delivery, pace)

Very good, Excellent lecturer. often lectures for other probabilities / statistics modules are not very good.

Support Classes (supervisions, tutorials, computer classes)

Good, like the fact you go through everything on the visulizer and that it is podcasted.

Course materials (notes, example sheets, solutions, textbooks)

Good.

Overall your course is great!

Please comment on the following for this course unit.

Lectures (content, delivery, pace)

Content is good although some steps in examples are not explained very well when they rely on past knowledge which can be hard to remember as we ~~perhaps~~ haven't used it in a long time.

Examples are very helpful.

Support Classes (supervisions, tutorials, computer classes)

tutorials are good especially when examples are worked through on the visualiser

Course materials (notes, example sheets, solutions, textbooks)

course materials are good & helpful.

Lecturer: Saralees Nadarajah.....

Your name (optional):.....

Please comment on the following for this course unit.

Lectures (content, delivery, pace)

Good pace with plenty of examples.
Lecture notes can be better in terms of ~~content~~ less on examiners
material present.

Support Classes (supervisions, tutorials, computer classes)

Awesome

Course materials (notes, example sheets, solutions, textbooks)

Lecture notes can be better overview of year

School of Mathematics

Week 3 Feedback Form

Course Code: Math 38181/48181/68181

Extreme Values and Financial Risk.....

Lecturer: Saralees Nadarajah.....

Your name (optional):.....

Please comment on the following for this course unit.

Lectures (content, delivery, pace)

Good content, delivery pace is good with a consistent pace.

Support Classes (supervisions, tutorials, computer classes)

Tutorials help me to understand more about the topics thought.

Course materials (notes, example sheets, solutions, textbooks)

Notes are slightly too concised, would love to have more relatable examples. Example sheets are great for exercise and solutions are good guidance.

Extreme Values and Financial Risk.....

Lecturer: Saralees Nadarajah.....

Your name (optional):.....

Please comment on the following for this course unit.

Lectures (content, delivery, pace)

- Happy with the delivery and pace and enjoying the content so far

Support Classes (supervisions, tutorials, computer classes)

- Really helpful that the ~~podcasts~~ tutorials are podcasted as well
- always easy/quick to get help on a question

Course materials (notes, example sheets, solutions, textbooks)

- It is useful to have the solutions up if struggling with a question so that is really good
- I don't really use the printed notes because the handwritten ones put up after lectures are much more detailed

School of Mathematics

Week 3 Feedback Form

Lectures (content, delivery, pace)

- my favourite lecture since being in manchester
- keeps everyone engaged and makes sure to revise stuff people are unsure of
- makes sure he goes through loads of examples. 10/10
- only lecture to show interest in students.

Support Classes (supervisions, tutorials, computer classes)

- tries to go through all questions which is amazing but can be a bit rushed. 8/10

Course materials (notes, example sheets, solutions, textbooks)

- love that everything is podcasted - good for when you don't quite understand something in a lecture/tutorial as you can go through it again
- find it helpful that all notes, tutorials, solutions etc. are given at the beginning - can go at own pace. 12/10

Lectures (content, delivery, pace)

good, very well set out and explained

Support Classes (supervisions, tutorials, computer classes)

nice set up, goes through most questions
which helps

Course materials (notes, example sheets, solutions, textbooks)

notes and example sheets very good. solutions
also great.

Lectures (content, delivery, pace)

Really good a little slow but very informative &
everything is explained well

Support Classes (supervisions, tutorials, computer classes)

Good would prefer exercise sheets to be
in order ie 1,2,3...

Course materials (notes, example sheets, solutions, textbooks)

Very extensive & helpful
easy to locate
lots of material if needed.

Lectures (content, delivery, pace)

Contents are interesting and they provide an all around understanding of the subject.

Support Classes (supervisions, tutorials, computer classes)

Tutorials (only 1 attended so far) are useful to better understanding what previously seen in class. ~~with~~ a

Course materials (notes, example sheets, solutions, textbooks)

Solutions on the example sheets are sometimes not exhaustive (not clear how to get from one point to another), but the missing parts ^{are} usually explained in class.

Notes and example sheets are good and helpful.

Please comment on the following for this course unit.

Lectures (content, delivery, pace)

- ① not hard to understand
- ② nice teaching speed.
- ③ 9:00 am lecture may cause sleeping.

④ when using two screen, could you put same hand-written notes on both screen, it's hard for students to see sit in

Support Classes (supervisions, tutorials, computer classes) ~~to see~~ sit in on side of room

Your emails give full detail on tutorials, so I need check and read these email carefully.

Course materials (notes, example sheets, solutions, textbooks)

Lectures (content, delivery, pace)

useful, relevant, well paced.

Support Classes (supervisions, tutorials, computer classes)

Smaller supervision classes would be more effective

Course materials (notes, example sheets, solutions, textbooks)

- This is a truly excellent course
I would get more out of the problem sheets, I feel, if the 'tricks' were given as a hint in their first occurrence, eg but perhaps that would be too easy?
- Podcasts, website and real life examples all excellent.

Lectures (content, delivery, pace)

Thank you for preparing enough sources for us to learning the course clearly. Only one advise on the Lecture is that sometimes the handwriting on the screen can not be seen clearly because of the too much shining light.

Support Classes (supervisions, tutorials, computer classes)

Hope that we can be told which is the highlight of the exam on the exercise sheet, which can give a more convenient way to review for final and mid-term exam.

Course materials (notes, example sheets, solutions, textbooks)

Enough. Thank you.

Lectures (content, delivery, pace)

His lectures are brilliant!

He goes at a good pace.

And teaches everything Very clearly.

Support Classes (supervisions, tutorials, computer classes)

Support Classes are great

He is very helpful.

He clearly cares about students as he walks around and speaks to us individually.

He is very nice and approachable

Course materials (notes, example sheets, solutions, textbooks)

everything is great.

He provided all the notes and even emails what we are going to be doing in ~~advance~~ advance.

Overall great lecturer!

$$k \left(\frac{1}{a} - \frac{1}{x} \right) \Rightarrow 1$$

School of Mathematics

$$\frac{1}{a} - \frac{1}{x} = \frac{1}{k} \left(\frac{1}{a} - \frac{1}{k} \right) = \frac{1}{x}$$

Week 3 Feedback Form

$$x = \frac{1}{\frac{1}{a} - \frac{1}{k}} = \frac{1}{\frac{k-a}{ka}}$$

Please comment on the following for this course unit.

Lectures (content, delivery, pace)

lectures are delivered at a great pace with clear explanations of content. There ~~are~~^{is} always space to ask questions if in doubt.

Context is also very enjoyable and easy to follow.

Support Classes (supervisions, tutorials, computer classes)

Supervisions are very helpful.

Though the Tuesday supervision is in a small room which does not allow Saralees to move around to students and also means some students are left without seats.

Course materials (notes, example sheets, solutions, textbooks)

COURSE MATERIALS ARE SUPER.

It's always nice to know everything is podcasted in case something is missed in lecture/supervision it is always comforting to know you can go over it at home with the podcast

Please comment on the following for this course unit.

Lectures (content, delivery, pace)

Pace has been a bit fast when doing ^{some} computational because we want to make sure we copy everything. Please make sure the second view is zoomed out enough so we can see more.

A whole lecture on a massive proof we didn't need to know or understand seemed a waste of time and paper.

Support Classes (supervisions, tutorials, computer classes)

Course materials (notes, example sheets, solutions, textbooks)

Loads of questions - could you star questions which are really useful? or let us know which ones you will go through before the tutorial?
