Week 3 Feedback Form

Course Code: Math38181/Math48181/Math68181
Extreme Values and Financial Risk

Lecturer: ...Saralees Nadarajah.....

Your name (optional):.....

Please comment on the following for this course unit.

Lectures (content, delivery, pace)

- Great delivery
- The pace is perfect
- good use of example throughout the lecture
- lectures entertaining

Support Classes (supervisions, tutorials, computer classes)

- very helpful tutorials
- love all the examples
- good feedback

Course materials (notes, example sheets, solutions, textbooks)

- the online materials are the best of all the courses taught.
 - very well organised + easy site to use.
-

Lectures (content, delivery, pace)

- good pace
- find examples very useful

Support Classes (supervisions, tutorials, computer classes)

- find structure of example class to be efficient.
Like how you show us how to do the q.s.

Course materials (notes, example sheets, solutions, textbooks)

- really helpful online notes

Lectures (content, delivery, pace)

good

I like your jokes

Support Classes (supervisions, tutorials, computer classes)

good

Course materials (notes, example sheets, solutions, textbooks)

very helpful, but the notes that you distributed as notes during lectures don't match, I am confused, and if I don't understand something I don't know what to read in the notes.

Lectures (content, delivery, pace)

Too fast, writing all the time and
cannot think of what I am writing
However v. good lecturer

Support Classes (supervisions, tutorials, computer classes)

V. Good

Course materials (notes, example sheets, solutions, textbooks)

Excellent

Lectures (content, delivery, pace)

content ✓

delivery - very detailed, lots of examples to help with learning

pace - slow, but that's a really good thing - allows students time to grasp the subject

Support Classes (supervisions, tutorials, computer classes)

tutorials - very comprehensive, saralees is great at answering any questions

Course materials (notes, example sheets, solutions, textbooks)

notes - in depth, perhaps it could be more defined what is necessary to learn (for the exam)

example sheets - very long, but again this is good for practice

solutions - very detailed ✓

Lectures (content, delivery, pace)

Good - sometimes moves notes up too quickly on visualiser, and writes too quickly can be hard to keep up.

Support Classes (supervisions, tutorials, computer classes)

Good - but why do we jump from sheet 1 to 4?

Course materials (notes, example sheets, solutions, textbooks)

Good

Lectures (content, delivery, pace)

The content is quite difficult - with all the tricks you have to remember.

Delivery and pace are good.

Support Classes (supervisions, tutorials, computer classes)

^{Tutorials}
~~Supervision~~ classes are very helpful.

Course materials (notes, example sheets, solutions, textbooks)

All great.

Lectures (content, delivery, pace)

Good pace in lectures and lots of examples ;)

Support Classes (supervisions, tutorials, computer classes)

I like that each question is gone through in the tutorials rather than just giving solutions, it's much more helpful.

Course materials (notes, example sheets, solutions, textbooks)

course materials are excellent, lots available which is very useful.

Lectures (content, delivery, pace)

Content good, like that each ~~section~~^{part} has examples.

Please don't move away the sheets too fast "it's all online" is not so great to say, as we come to the lectures to not have to copy up at home.

Support Classes (supervisions, tutorials, computer classes)

Good! Like that you go through everything

Course materials (notes, example sheets, solutions, textbooks)

The website is very well stocked and like the email support.
